

8. How to link an HIV Exposed Infant's record to a Mother's record at a Post Natal Care Visit

PT Tracker / User Manual / 8

Objective:	Ensure that details for an HIV positive mother and her exposed infant, previously not registered, are linked at post natal care and recorded in PTracker,
Tasks:	<ul style="list-style-type: none"> To link the newly created infant's record at PNC to the mother's record during a PNC visit for a Mother-baby pair.
When:	When an exposed infant, not previously registered on PTracker at any facility, comes for a PNC visit after delivery (maternity) from 6 days to 18-24 months old.
Who:	PMTCT staff. These users should have logins.
Required Materials:	Username, password, hardware with an Firefox web browser or ODK collect application to access the PTracker remotely installed Mother Baby Follow up Care Register with HIV positive mother and exposed infant details for PNC, HIV testing and ART initiation details, Neviraprine prophylaxis, demographic information, Next visit date, PTracker ID and ART Unique number (if infant is positive).

STEP	ACTION	
1.	Follow these steps BEFORE linking Mother to Exposed Infant.	
	<ol style="list-style-type: none"> First create a new client record the exposed Infant's Mother (who should not be previously registered) in PTracker. See steps in Section 2. How to Register or Create a New Client Record in PTracker After registering the mother's demographic details, record the mother's PNC visit as recorded in MBFU register. See steps in Section 6. How to Record a Mother's Post Natal Care Visit in PTracker. Create a new client record for the infant. See steps in Section 2. How to Register or Create a New Client Record in PTracker. Remember the Infant's PTracker ID has to be generated from the mother's PTracker ID!!! 	
2.	After registering the infant, go to the General Actions box on the right and click on the Infant-PostNatal Form .	
3.	<p>The Infant's Postnatal Form is shown on the screen and should appear as below:</p> 	

STEP	ACTION	
4.	To link the baby to the mother, go to Summary Information tab then Create new relationship for Infant and click Search for Person	
5.	After clicking Search for Person , the page should appear as shown. As you enter the mother's name, her summary details should appear, then click on her details. In this case the search was made for Josephine Haufiku .	
6.	When you click on the mother's details, the Infant Postnatal Form page will be updated as is shown here	
 Note: The link between mother and baby (creating a relationship) can only be done from the Infant Postnatal Form .		
7.	Follow Steps 13-23 in Section 7 (How to record a Post Natal Visit for an HIV Exposed Infant in PTracker) to record the details of the infant's PNC visit.	
8.	This task is complete when, after clicking on Enter Form .	
9.	The client summary page appears and displays the recorded PNC visit on 12 July 2017 shown under Recent visits in the example shown below for Mirjam Haufiku . You can the Mother's record (Josephine Haufiku) linked to the Infant's record.
