

6. How to Record a Mother's Post Natal Care Visit PTracker

Objective:		To ensure that the client’s (Mother) postnatal care (PNC) visits details are recorded in PTracker	
Tasks:		a. Enter client’s (Mother) PNC visit details b. Create a new client record – if not previously registered- then enter details as recorded in Mother-Baby Follow Up Care register	
When:		When a client (Mother) comes for PNC visits and ensuing follow up visits after delivery (maternity) from 6 days up to when infant is between 18-24 months old OR after cessation of breastfeeding when final PMTC outcome for baby is determined.	
Who:		PMTCT staff. These users should have logins and data entry roles to create visits.	
Required Materials:		Username, password, hardware with a Firefox web browser or ODK collect application to access the PTracker remotely installed Mother Baby Follow up Care Register with client details for PNC visits (HIV testing and ART initiation details, ARV prophylaxis, demographic information, PTracker ID and Next visit date).	
STEP	ACTION		
1.	IF	THEN	
	a. Newly unregistered client on this visit.	See steps in Section 2. How to Register or Create a New Client Record in PTracker	
	b. Client is already in PTracker from previous registration	Go to step 2	
Avoid creating duplicate client records!			
Before creating a new client record, FIRST confirm that the client does not have an existing record in PTracker by searching for the client’s name or previously used PTracker ID			
2.	Navigate to the Search Client screen to confirm that the client exists in PTracker. by clicking on the Find Client Record button.		
	From the Find Client Record page, enter the client’s name into the search box.		
	<i>For example, if a new client’s name is recorded in the register as or client gives her name as Ndapewa Shilonga. <u>First</u> search for the clients name by a part of the provided name. Entering “Nda” in the Search box returns a list of all records for clients whose names contain with “Nda”.</i>		
3.
